Sierra Camera Club Members

Your club needs your help!!! We need officers and committee members for next year. The following offices need to be filled: President, Vice President, Treasurer and Assistant Director for Prints.

One Committee that need help is the Refreshment Committee The Kruegers have been doing all three meetings each month. We need someone to take over the Nature/Travel meetings and someone for the Print meetings.

Another Committee that needs help is the Welcome Committee. This task involves handing out name tags and greeting members and visitors. It would be great to have at least 3 people, one for each division.

Since many of us travel it would also be helpful to have some substitutes.

The election takes place on Tuesday November 13th so please step up quickly. To volunteer or get more information contact Charlie.

"Thunderbirds Heading Home" by Ron Goldman

Exploring Photography Field Trips

This will be the LAST Photo Walkabout for 2012! So for those of you who have a weekday to goof off, here's a little incentive to get out there and practice your photographic skills. Join me every four weeks or so on a Photo Walkabout, and we'll visit a different location every month. Here's how it works... when you RSVP (and you must RSVP to vote and get the updates), you will submit an idea on where you might like to go and shoot for that month. Everyone will have a chance to vote on the submitted ideas via e-mail. Then, after the voting closes, the TIME and LOCATION will be posted. It will be posted a few days before the meetup so that you all will know ahead of time where we will be going. Plan to have lunch with us and talk shop. The weather or the season could even dictate what we want to shoot. Either way, the plan shouldn't take us farther than an hour or so away in any given direction. Remember, this will repeat about

every four weeks, so if you can't make it to one, do the next one! Remember, time and location to be determined! (10:00 a.m. is just a default setting) Sound interesting? Come along and find out!

Jan Lightfoot

Northern California Photography Group

This Meetup group has not been active for about a year. It is the group that was lead by Albert de Bruijn. There are now new leaders, Andy Brooks and Laura Twining. Suddenly there are one and two meetups a week.

by Truman Holtzclaw

Print Meeting

The last print meeting for this year is Thursday November 1st. You may enter 2 images in each division and one make up for a total of 4 images in each division.

For the end-of-the-year judging you may enter up to 2 prints in each division. They must be prints that you have entered in print competition this year. The end-of-the-year **Matted Prints** may be delivered to me at the November Meeting or the December Christmas Party. Dave Kent

President's Message

It is a little early to be thanking the Board for this year's work, but we have been served by a great board and it is time to think about next year's board. Several board members will not be seeking reelection and we need to find people to replace them. Many board members have served multiple terms and need some time off the board. It is a bit of work, but being on the board is a rewarding undertaking. You will also learn a lot about photography. A club is only as strong and functional as its board. Please consider running for the board. We need new faces on the board whether new members or veterans of the club. At this time I am aware that we will be looking for a new President, Vice-President, Assistant Print Division Director, and Treasurer.

November General Meeting

As a reminder, our November General Photography meeting will be a special program on Legal Issues for Photography. Have questions about when you can and can't take a picture, what types of images can and can't be sold, how to protect your images from unauthorized use, how to copyright your images, or when you need photo releases? Get your answers soon.

California Lawyers for the Arts has assisted us in arranging for attorney and photographer Amitai Schwartz to present his photography workshop for us. This workshop will address legal issues concerning the use and sale of photographic images, including ownership, reproduction, copyright, manipulation, model and property releases and more.

This is normally a for fee program, but through a partnership and cost sharing with Viewpoint Gallery, it will be free to Sierra Camera Club and Viewpoint members, and guests. The meeting is at our normal meeting location at 7 p.m. on November 13. Don't be afraid that this will be full of legalize. I have taken the class and it is aimed at photographers and the speaker is very open to discussion.

Charlie

Special Gold Rush Meeting George P. Lepp From Snowflakes to GigaScapes Maximizing the Creative Power of Today's DSLRs

**A Seminar by George D. Lepp
Sunday, December 2, 2012
Crowne Plaza Sacramento Northeast, 5321 Date
Avenue(I-80 at Madison Ave.) Sacramento, Ca.**

Short Description: The versatility of today's DSLR has literally revolutionized outdoor photography, and in this program George Lepp offers a survey of the latest, greatest techniques. Whether you're photographing sports, wildlife, close-up, or landscape imagery, the old outdoor challenges of unpredictable lighting and moving subjects are easily overcome in the digital age. But modern photography offers so many more ingenious solutions to the limitations that once vexed film photographers! Computerized accessories and innovative software programs enable virtually unlimited depth of field, expanded tonal range, ultra-high resolution composite landscape panoramas, high-magnification, time-lapse, and HD video capture, all with a single DSLR. These creative tools are easily within reach of outdoor and nature photographers—and commercial and studio photographers as well—who want to expand their photographic repertoires. But you can't apply what you don't know, so listen to George before you start your next project.

This program will include:

Application of expanded ISO capabilities to low-light and moving subjects.

Capture techniques for unlimited depth of field in landscape and macro photography and assembly using Photoshop CS5, Helicon Focus and Zerene Stacker software.

High Dynamic Range capture and processing techniques to achieve expanded tonal range and clarity for natural results and creative effects.

How George uses the GigaPan system to capture the ultra-high-resolution composite panoramas that Canon USA displays at trade shows and expositions in sizes up to 5' by 20'.

Capturing high-magnification images of microscopic subjects using Canon DSLRs' Live View function in combination with unlimited depth of field techniques.

Story-telling with time-lapse and video captures, using low-cost capture accessories and simple assembly and editing software.
